Suggestions for preparing for the final

Re-work all tests and quizzes. Allow yourself 1.25 hours for each exam and 15- 20 minutes for each quiz. Then check the answers and work, with the answer key. Use My Math Lab for practicing problems over concepts that you are still having difficulty with. If you forgot how to do a problem go back to your notes and review the examples in the ebook or use My Math Lab and it will give you examples or work out the problems with you.

If you have time, review every section in the book, that we covered, by reading the ebook and examples, and try the practice problems that match each example. Also do the cumulative reviews that follow each chapter.

**GOOD LUCK
